

## TECHNICAL

**Programming & Data:** Python (pandas, scikit-learn, TensorFlow, spaCy, SHAP), SQL, NLP, R, A/B testing, data cleaning & validation

**BI & Visualization:** Power BI, Tableau, Plotly, Excel, IBM Cognos, dashboard development, data storytelling

**Analytics:** KPI design, Monitoring & Evaluation, Forecasts & Budgeting, Survey Design, Requirements Gathering, Impact Analysis

**AI & Platforms:** MS Copilot Studio, Power Automate, Oracle APEX, Hugging Face, Git/GitHub

## EDUCATION

**FORDHAM UNIVERSITY, GABELLI SCHOOL OF BUSINESS**

New York, NY

**MS, Business Analytics**

August 2025 – December 2026

*Relevant Coursework: Machine Learning, Python, Data Management & SQL, Systems Analysis & Design, Data Visualization*

**THE GEORGE WASHINGTON UNIVERSITY, ELLIOTT SCHOOL OF INTERNATIONAL AFFAIRS**

Washington, DC

**BA, International Affairs, concentration in International Economics, minor in Russian**

2014 – 2018

## SELECTED RESEARCH & PROJECTS

**Multi-Dimensional News Coverage Profiles of Contested Topics** | Python, scikit-learn, spaCy, NLTK, Plotly

- Designed and executed a quantitative NLP study of 2,334 news articles, developing a reproducible Python pipeline (TF-IDF, NER, NMF, sentiment analysis, moral foundations scoring) and delivering findings through a report and interactive web application.

**March Madness Predictor** | Python, TensorFlow, CNNs, Scikit-learn

- Won 1st place in the university-wide Deloitte-sponsored *March Data Crunch Madness* competition; built a CNN shot-map model trained on 2M+ records, feeding an FT-Transformer that reached 74.5% accuracy and 0.80 AUC across 2,278 matchups.

## EXPERIENCE

**UNITED NATIONS Department of Economic and Social Affairs**

New York, NY

**Graduate Analytics Consultant**

January 2026 - present

- Built a department-wide multi-agent AI knowledge platform in MS Copilot Studio, increasing efficiency in retrieving institutional knowledge; raised retrieval and answering accuracy from ~55% to over 95% through iterative prototyping and A/B testing.
- Gathered requirements and feedback directly from program officers to shape platform design and align with real staff workflows.
- Engineered Power Automate ETL pipelines to query (KQL) and transform hundreds of unstructured files to structured databases.
- Secured directorial approval and funding to implement prototypes and lead user onboarding.

**NATIONAL DEMOCRATIC INSTITUTE**

Washington, DC

**Program Officer, Central and Eastern Europe**

May 2022 - May 2025

- Designed and owned the monitoring and evaluation system for a \$15M USAID program in Kosovo: built 50+ indicators, cleaned and validated the data quality, and produced quarterly analyses that drove program decisions.
- Concurrently consolidated and analyzed performance data from six field offices, producing Tableau visualizations and executive briefings for senior U.S. Government and European donors to demonstrate impact and inform funding decisions.
- Authored an independent evaluation of a four-year six-country electoral-integrity program, synthesizing program data, metrics, and stakeholder interviews resulting in a major strategic redesign of future programming.
- Solely managed a \$215K, six-country regional program, coordinating 10+ partner organizations and facilitating regional peer-learning workshops that produced a shared research strategy to counter AI-driven disinformation threats.
- Developed analytical reports and grant proposals contributing to more than \$20M in new and renewed donor funding.
- Rebuilt budget forecasting and variance analysis processes, improving year-end financial accuracy and reallocating savings to new program priorities, while overseeing subgrants and donor compliance across the portfolio.
- Supervised, coached, and developed five program staff across three projects, improving reporting quality and on-time delivery.

**IREX, Information and Media Practice**

Washington, DC

**Program Coordinator**

Jan 2020 – May 2022

**Program Associate**

Nov 2018 – Jan 2020

- Designed and deployed a Power BI dashboard for a global digital-security program, building the underlying data pipeline and 25+ live metrics refreshed multiple times per day, providing State Department donors continuous visibility into program progress.
- Solved a complex program evaluation challenge by combining Nielsen ratings with a custom social media tracking system to quantify impact across media programs supporting independent local-language journalism in Moldova and Central Asia.
- Developed the proposal, budget, and monitoring framework that won a competitive \$1M State Department award.
- Managed budgets and forecasting across multiple programs using Excel and IBM Cognos, tracking variances and recasts to inform spending and staff-allocation decisions.
- Executed five international training events, independently leading on-site operations in Angola and Spain, while implementing feedback surveys to capture participant data and ensure continuous improvement.

## ADDITIONAL

**Language:** Russian (intermediate) | **Interests:** Music composition and production, vinyl DJing, soccer, golf, and international travel
